

Webinar:

Mandatory Eco-design and energy efficiency requirements in the European Union

January 20, 2012 at 11:00am Eastern Time / 5:00pm Brussels Time

U.S. exporters have to meet energy efficiency requirements in order to sell their products in Europe. The **Energy Related Products (ERP) Directive** has already set energy efficiency requirements for computers, televisions and set top boxes, battery chargers, external power supplies, lighting products, motors, fans, pumps, refrigeration and air conditioning, and dishwashers and washing machines. The EU has announced that many other products will come within the **scope of the ERP Directive** in the years ahead such as machine tools, transformers, and network, data processing and data storing equipment just to name a few. Regulation arising from the ERP Directive is subject to conformity assessment / CE Marking as well as for energy efficiency. Learn how to meet the new requirements from experts who will talk about how to comply with the **eco-design implementing measures** and about **market surveillance**.

Live Webinar:

Moderated by the U.S. Dept. of Commerce Europe Team

Featured Speakers:

- **Mr. Chris Smith**
Technical Enforcement Manager, UK National Measurement Office. Mr. Smith is responsible for market surveillance and of the EU RoHS, ErP and Batteries directives. He will:
 - Present an overview of approaches to market surveillance
 - Provide steps to compliance

- **Dr. Chris Robertson**
Head of Regulatory Compliance, ERA Technology Ltd. (UK). Dr. Robertson is an expert on the EU environmental legislation (RoHS, REACH, WEEE and ERP). He will:
 - Explain how to comply with eco-design implementing measures
 - Address technical issues (e.g. scope and testing/standards)
 - Address what other relevant products may be covered

- **Ms. Sylvia Mohr**
Standards Specialist at the U.S. Mission to the EU in Brussels, Belgium. More than 15 years handling CE marking issues for U.S. companies. She will:
 - Provide overview of eco-design framework legislation and implementing measures
 - Discuss the legislative development process

Session Fee: \$65, Payable by credit card.
