

**Workshop on Intelligent Transportation Systems (ITS)  
September 29 – October 1, 2010  
Prague, Czech Republic**

**OBJECTIVES & SCOPE**

- Provide a forum for the discussion of standards and codes, their development, conformity assessment and regulation in the United States and European countries including the Czech Republic, Poland, Hungary, Croatia, Slovakia, Slovenia, Latvia, Estonia, and Lithuania, as they relate to intelligent transportation systems and their components.
- Discuss the role of standards and best practices that address safety, security, communication, congestion and incident management, and infrastructure development, while contributing to enhanced trade of associated goods and services.
- Identify and address barriers to development, use and adoption of standards pertinent to this sector.
- Address the role and authority of relevant agencies and organizations.
- Identify current and future technical areas of cooperation, and where appropriate, identify possible avenues to facilitate such cooperation.
- Establish peer-to-peer contacts and programs, where appropriate
- Extend the knowledge of participants on available resources.
