National Initiatives: Industry perspective

“National capabilities” that enable sustainable growth of industry

“National strategies and programs” that leverage private sector capabilities, enhance trust ecosystem and fill critical gaps

“National policies, laws and regulations” that are promoting faster integration with global economy and market place

“National concerns and obligations” articulated in a predictable, pragmatic and coherent actions

“National objectives and goals” shouldn’t lead to hindrances, reverse the process of globalization and inhibit cross-border flow of data

“Global diplomacy efforts” should be directed at more harmonized, standardized, democratized and participatory global order with respect to ICT affairs

Standardization, Indian industry

Serving global clients

Standardization, predictability & scalability

Cost & effort optimization

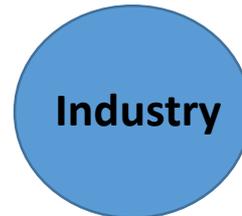

Low industry participation

Familiarity with management standards

Little contribution to the technical standards

Interest

Participation

Industry

Adoption

Challenges

Management standards by service industry

Supplier driven standards

Globalization, customer acquisition

Long standard development cycle

Awareness

Resource and effort commitment

Thank You
