

# MILITARY SPECIFICATION

COOKIES; OATMEAL

BROWNIES; CHOCOLATE COVERED

## MIL-C-44072C

# Military Specification MIL-C-44072C - Cookies, Oatmeal; and Brownies; Chocolate Covered

Includes 26 pages of specifications

Excerpt: 3.3.5 Brownie coating. The brownies shall be completely enrobed with a continuous uniform chocolate coating (see 3.2.14) in an amount which shall be not less than 29 percent by weight of the finished product.

# NIST

Standards Coordination Office

## Current Federal Policy on Standards

June 2016

# Today's Discussion

- Legislation and Policies that Direct Federal in Standards Activities
- US Government Roles in the Standards System

# Current Legal and Policy Framework

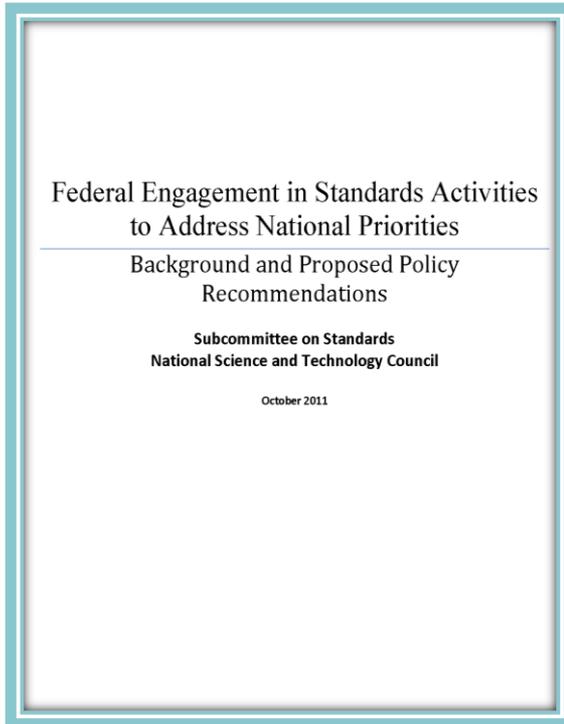

- National Technology Transfer and Advancement Act (NTTAA) - 1996
- OMB Circular A-119 – Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities – 2016
- Trade Agreements Act of 1979
- Agency Specific Laws, Rules, and Policies

# Recent Policy Documents

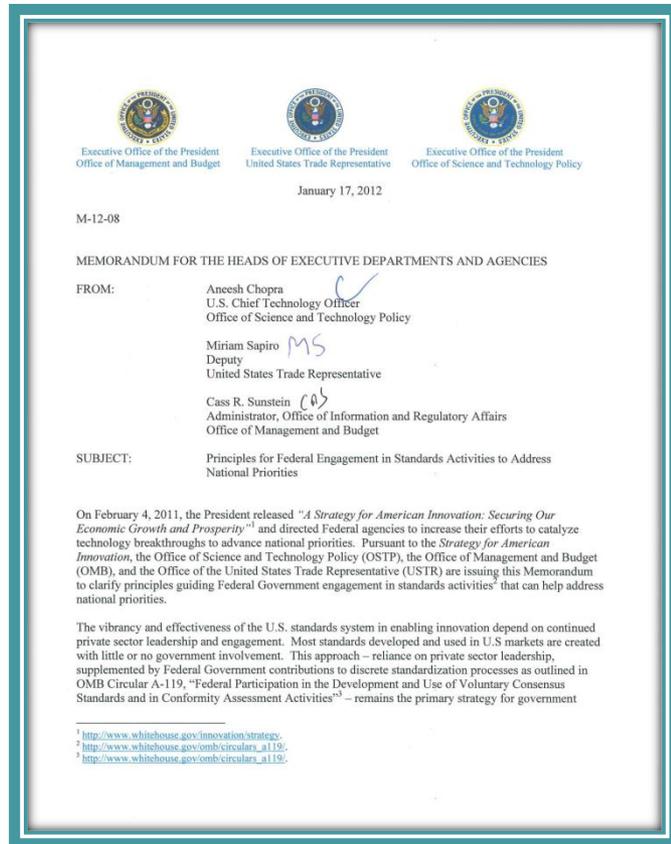

- Federal Engagement in Standards Activities to Address National Priorities, Background and Proposed Policy Recommendations, NSTC (October 2011)
- Policy Principles for Federal Engagement in Standards Activities to Address National Priorities, White House Memo (January 2012)

# Policy Recommendations

1. Recognize that in most government-private-sector standards engagements, the primary role of the government will continue to be that of active contributor to the private-sector-led process.
2. Identify the context(s) where Federal government leadership / coordination may be appropriate.
3. Outline objectives for government engagement in standardization activities to support national priorities.
4. Enhance effective coordination and participation by agencies.
5. Clarify agency responsibilities with respect to the full range of standards setting alternatives.
6. Lay out key principles underpinning voluntary standardization processes.

# White House Memo for Heads of Agencies

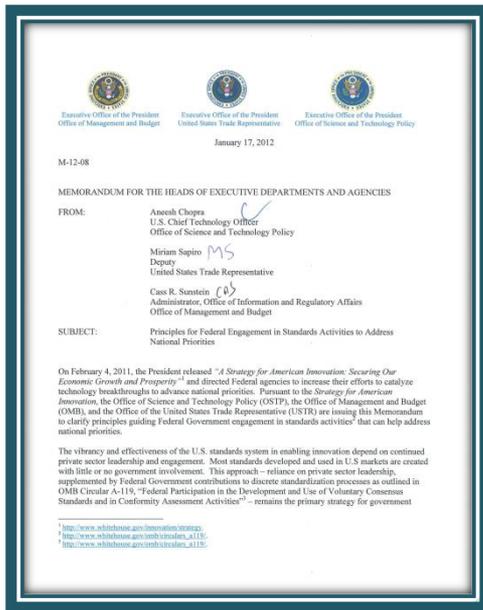

- Establishes principles for federal engagement in standards activities to address national priorities
- Reinforces innovation focus and private sector role in the standardization system
- Outlines strategic objectives for federal agencies
- Recognizes the growth of ICT technologies and changes in the standardization system in the past decade
- Emphasizes the global nature and broad impact of standardization and standards policy

# Strategic Objectives

- Produce timely, effective standards and conformity assessment schemes to meet identified need
- Achieve cost-efficient, timely and effective solutions to legitimate regulatory, procurement and policy objectives
- Promote standards and standardization system that promotes and sustains innovation and fosters competition
- Enhance U.S. growth and competitiveness and ensure nondiscrimination, consistent with international obligations
- Facilitate international trade and avoid the creation of unnecessary obstacles to trade (TAA)

# Principles Impact

Provides the private sector greater clarity and certainty about federal government engagement

Conveys the U.S. government's continuing commitment to the public-private partnership that is the foundation of the U.S. standards system

Sends an important message to both domestic and international audiences

Establishes a framework for policy makers (Administration and Congress) to use while defining their standards needs

Provides clear direction to agency staff and leadership in their efforts to catalyze technology breakthroughs to drive U.S. innovation and competitiveness

# Executive Orders

- E.O. 13563 – Improving Regulation & Regulatory Review
- E.O. 13609 – Promoting International Regulatory Cooperation
- E.O. 13610 - Identifying and Reducing Regulatory Burdens

**There are standards-related elements in each of these Orders**

# Conclusions on Standards Policy

- Clear policy signals regarding the important role that voluntary standards play in supporting regulatory programs
- Emphasis on agencies reducing costs and increasing efficiencies; lowering the regulatory burden on industry
- Integration and innovation, flexibility are key
- Regulatory cooperation is identified as an important tool for addressing global challenges

# National Technology Transfer and Advancement Act (NTTAA)

- Directs Federal agencies with respect to their use of private sector standards and conformity assessment practices.
- Objective is for Federal agencies to use private sector standards, wherever possible, in lieu of creating government-unique standards.
- Directs NIST to bring together Federal agencies, as well as State and local governments, to achieve greater reliance on voluntary standards and decreased dependence on in-house standards.

# NTTAA

(1) IN GENERAL- Except as provided in paragraph (3) of this subsection, **all Federal agencies and departments shall use technical standards that are developed or adopted by voluntary consensus standards bodies**, using such technical standards as a means to carry out policy objectives or activities determined by the agencies and departments.

(2) CONSULTATION; PARTICIPATION- In carrying out paragraph (1) of this subsection, **Federal agencies and departments shall consult with voluntary, private sector, consensus standards bodies and shall**, when such participation is in the public interest and is compatible with agency and departmental missions, authorities, priorities, and budget resources, **participate** with such bodies in the development of technical standards.

(3) EXCEPTION- If compliance with paragraph (1) of this subsection is inconsistent with applicable law or otherwise impractical, **a Federal agency or department may elect to use technical standards that are not developed or adopted by voluntary consensus standards bodies** if the head of each such agency or department transmits to the Office of Management and Budget an explanation of the reasons for using such standards.

# OMB Circular A-119 – Policy Guidelines on Implementation of the NTTAA

- Establishes policies on Federal use and development of voluntary consensus standards and on conformity assessment activities
- Revised in 1998 to be consistent with, and reinforce, the NTTAA

# Federal Agencies Need to Coordinate

Federal agencies, consistent with agency missions, need to coordinate their positions. OMB Circular A-119 [Section 14.c.(v)] emphasizes the need for interagency coordination and cooperation in voluntary standards development:

*“Ensuring, when two or more agencies participate in a given voluntary consensus standards activity, that they coordinate their views on matters of paramount importance so as to present, whenever feasible, a single, unified position and, where not feasible, a mutual recognition of differences.”*

# Goals of NTTAA and OMB A-119

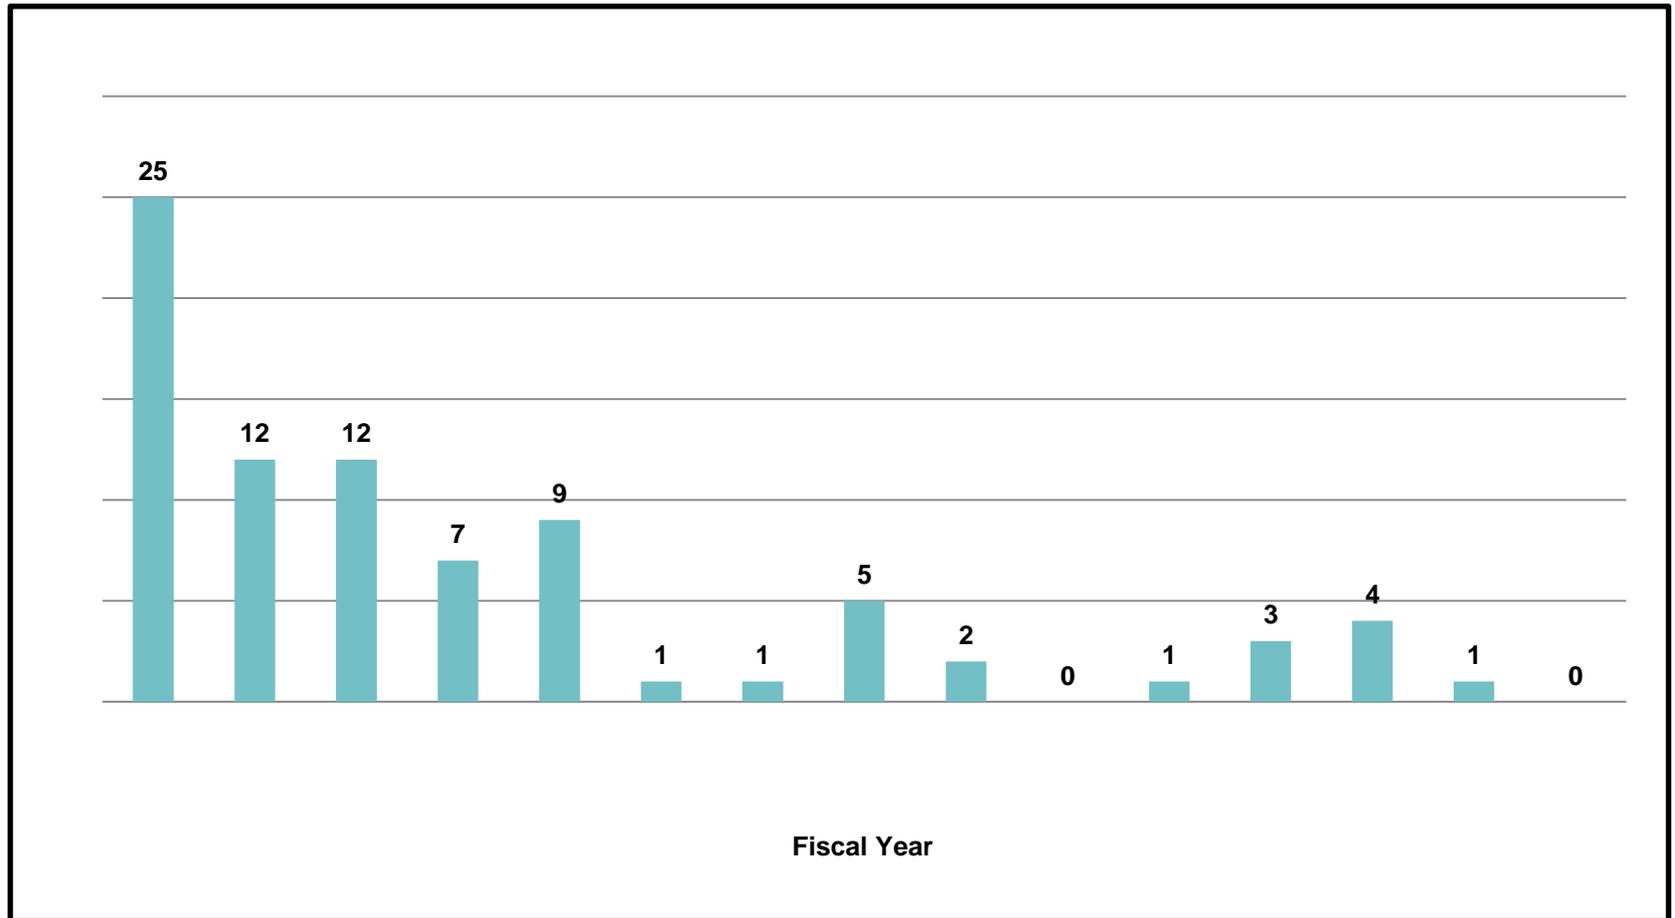

- Eliminate cost (of developing standards)
- Decrease the cost of goods and burden of complying with agency regulations
- Promote efficiency and economic competition through harmonization of standards
- Further the reliance on the private sector to supply Government needs
- Enhance collaboration with the private sector on standards that serve national needs

# NTTAA Has Been Effective

Since reporting began in 1997:

- **3,579** private sector standards have replaced Government-unique standards
- **91** Government-unique standards have been reported
- Only **53** government standards remain in lieu of private sector standards under the NTTAA

# New Government Unique Standards 1999-2014

# How the USG Engages in Standards

- USG plays many roles – user, specifier, participant, facilitator, advocate, technical advisor/leader, convener, provides funding
- Supports regulation, procurement and policy activities, and incorporates into voluntary programs
- Provides citizen services, enables connectivity between commercial and government IT systems, supports financial tools and incentives
- Competition, anti-trust, IPR, consumer protection laws

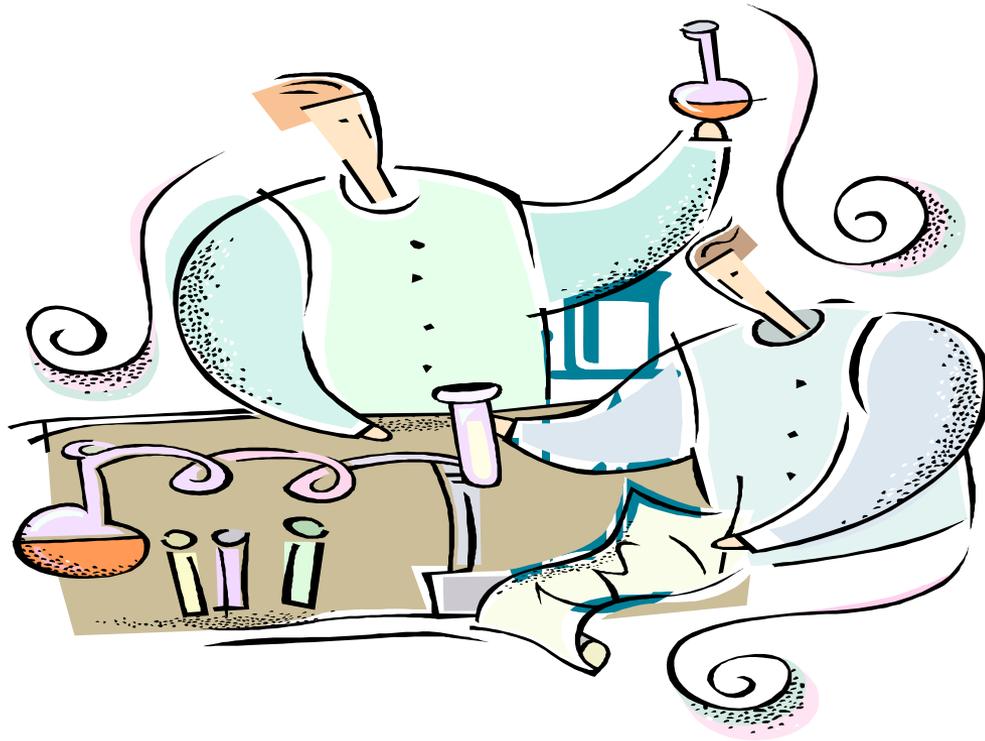

# Ways Voluntary Standards Are “Used” by Government

- Adoption into Regulation through Incorporation by Reference
  - ✓ Code of Federal Regulations
  - ✓ State and Local Adoption
- Decision not to Regulate - Deference
- Written into Federal Contracts - Procurement

# Government Role as Standards User

- In Regulation
  - ✓ Over 16,665 citations of standards incorporated by reference
  - ✓ Over  $\frac{3}{4}$  are non-government standards
- In specifying what USG will buy (procurement contracts)
  - ✓ 10,000's of standards are used in purchasing goods

# Government Role as Standards User – Adoption through Incorporation by Reference

Example: There are about 865 incorporations by reference in FDA regulations

# Government Role as Standards User – Adoption State and Local Adoption of Model Codes

# Government Role as Standards User – Deference

**Residential Gas Water  
Heater Standard**

**ANSI Z21.10/  
CSA 4.3-2004 (R2009)**

# Government Role as Standards User – Procurement

Example: NASA requires garments to meet standards developed by the Electrostatic Discharge Association

# Incorporation by Reference – NARA

## 36 CFR PART 1234—FACILITY STANDARDS FOR RECORDS STORAGE FACILITIES

(d) Penetrations in the walls must not reduce the specified fire resistance ratings. The fire resistance ratings of structural elements and construction assemblies must be in accordance with *ASTM E 119-98* (incorporated by reference, see §1234.3).

*(ASTM E-119 Standard Test Methods for Fire Tests of Building Construction and Materials)*

# GSA Exception

## **Government Unique Standard:**

**Federal Specification FF-L-2937 –  
Combination Lock, Mechanical  
(Incorporated: 2006)**

## **Voluntary Standard:**

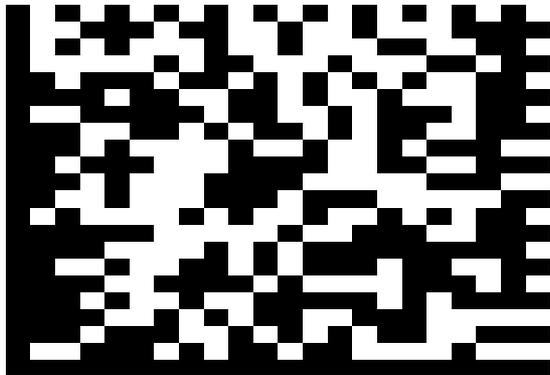

**UL 768 Combination Locks**

## **Rationale:**

The lock covered by the GUS is used for the protection of classified information and weapons. The UL specification did not meet identified government needs for dialing tolerance and bolt end pressure.

# Government Role as Standards User – Procurement - DoD

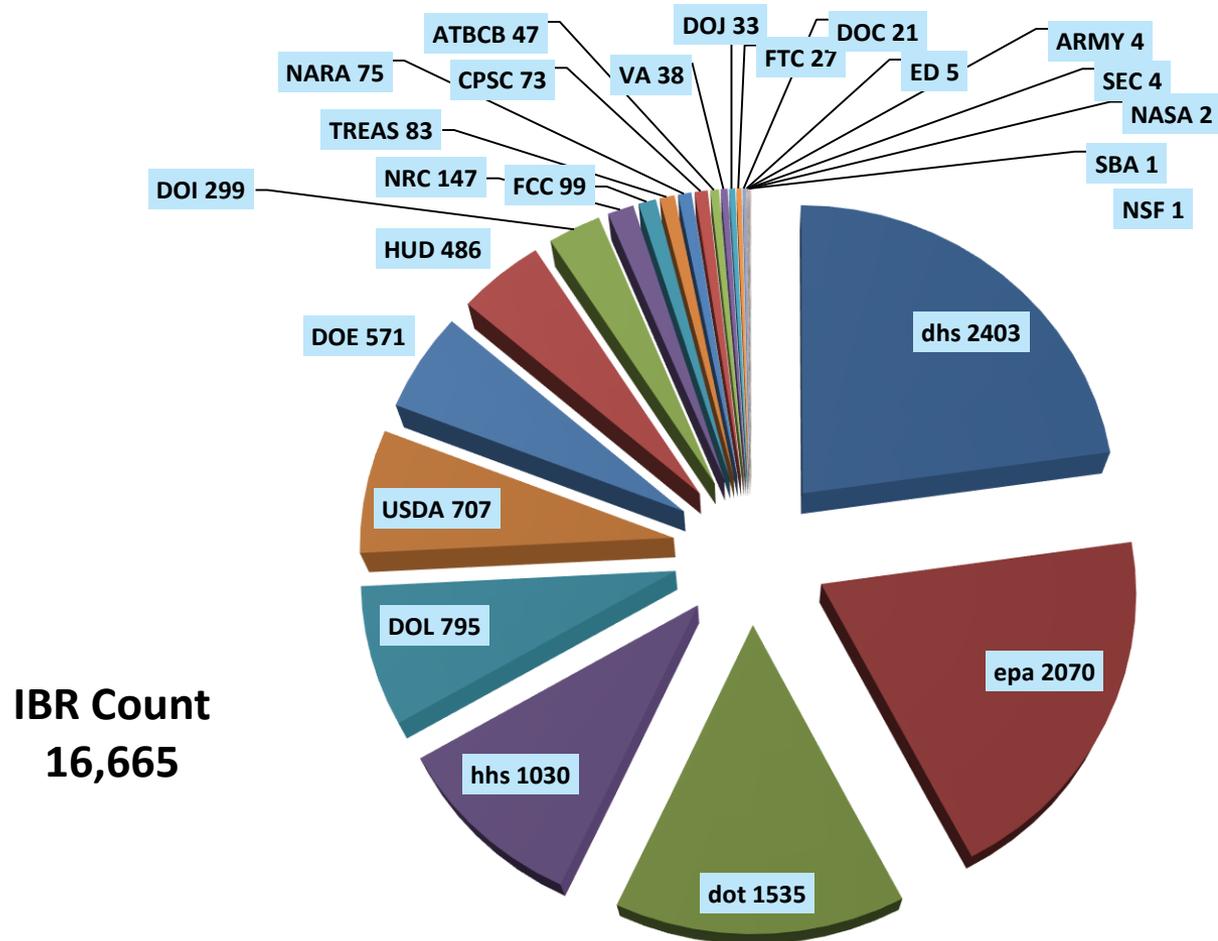

## Unique Item Identifiers

## MIL SPEC 130 accepts:

- **ATA CSDD**
- **ISO/IEC 15434**
- **AIAG B-4, AIAG B-17**
- **MH10.8.7**
- **CEA-706, CAGE**
- **GS1**
- **NASA-STD**

# Government Role as Standards User – Adoption through Incorporation by Reference

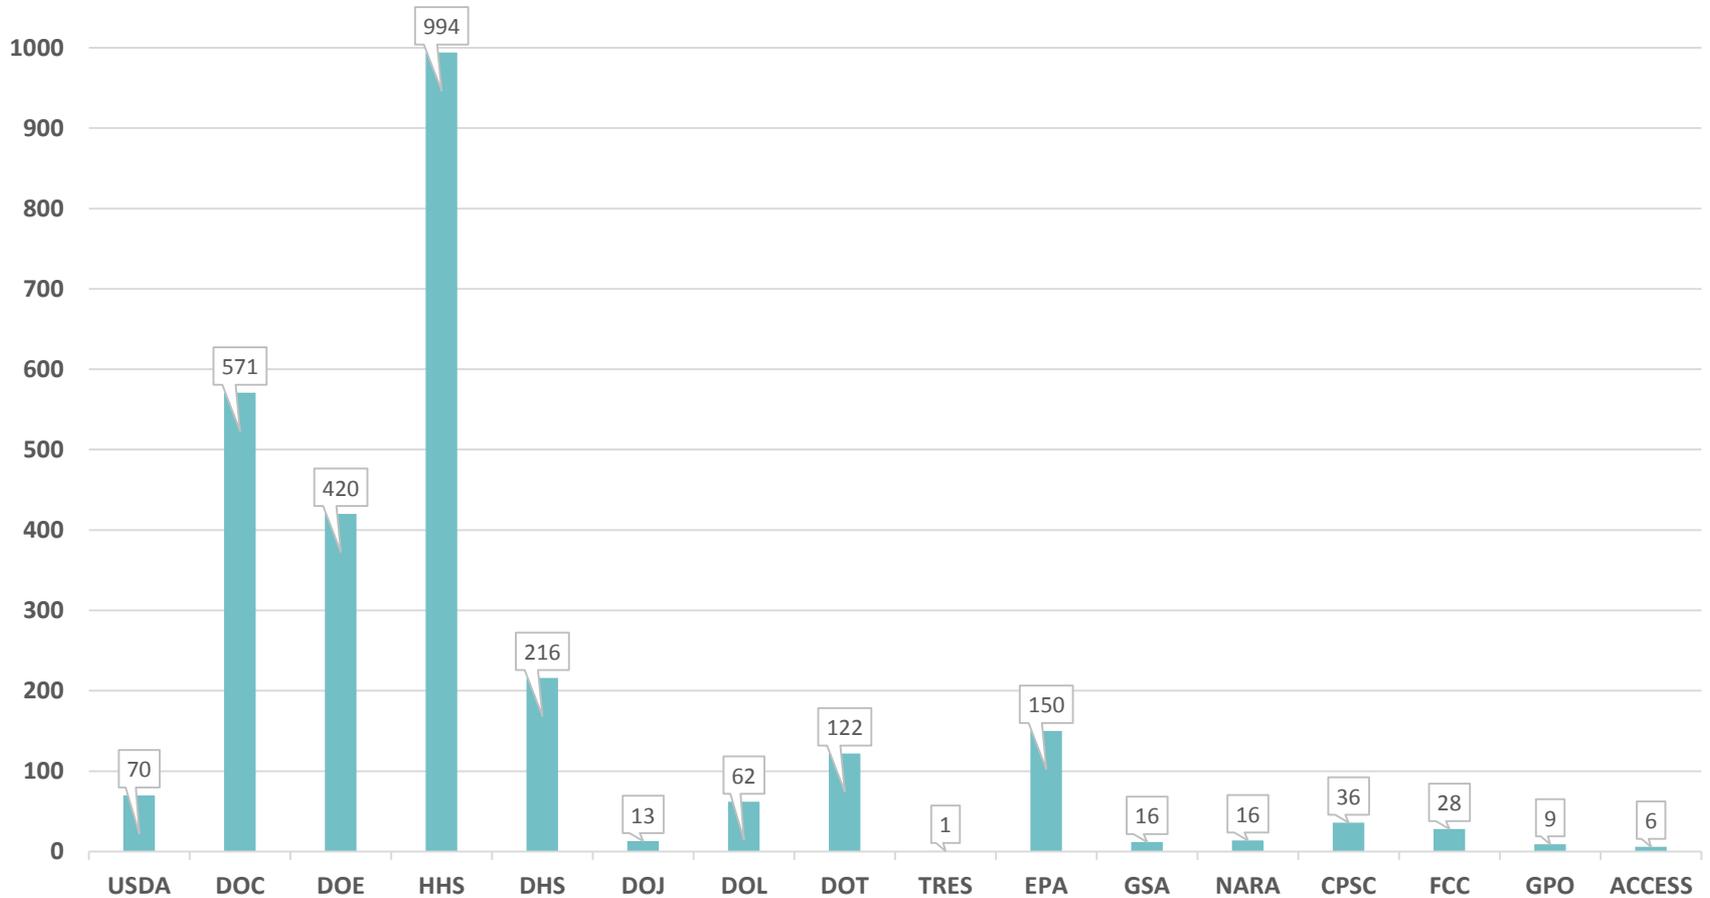

# Government Role as Participant – Standards Development

Government staff participate in the standards development process:

- Contribute technical expertise/resources
- Ensure government needs are being met

# Number of Federal Agency Staff Participating in Standards Setting Organizations in 2014

# Review

- Federal Government is an active player and user of the private sector led standards system in the US.
- Standards are used in diverse ways to support agency missions.
- Various laws, policies and guidance documents provide us a framework in which to operate.
- NIST's Standards Coordination Office and [www.standards.gov](http://www.standards.gov) are resources available to you.
- OMB A-119 revision highlights.

Thank You
