OFFICE OF STANDARDS SERVICES

**COMMERCIAL STANDARD CS133-46  
WOVEN-WIRE NETTING**

Commercial Standard CS133-46, Woven-Wire Netting, was withdrawn by the Department of Commerce in 1972.

CS133-46 was replaced by Federal Specification RR-F-221/2, Fencing Wire, Fence Posts and Accessories (Barbed Wire, Woven Wire, and Netting). This specification was cancelled in 1988. The following ASTM standards are now used:

ASTM A121, Standard Specification for Zinc-Coated (Galvanized) Steel Barbed Wire

ASTM A116, Standard Specification for Zinc-Coated (Galvanized) Steel Woven Wire Fence Fabric

ASTM A390, Standard Specification for Zinc-Coated (Galvanized) Steel Poultry Fence Fabric (Hexagonal and Straight Line)

ASTM A584, Standard Specification for Aluminum-Coated Steel Woven Wire Fence Fabric

ASTM A585, Standard Specification for Aluminum-Coated Steel Barbed Wire

ASTM A702, Standard Specification for Steel Fence Posts and Assemblies, Hot Wrought

The first five standards are under the jurisdiction of Committee A05 on Metallic-Coated Iron and Steel Products, and is the direct responsibility of Subcommittee A05.12 on Wire Specifications. ASTM A702 is under the jurisdiction of Committee A01 on Steel, Stainless Steel, and Related Alloys, and is the direct responsibility of Subcommittee A01.15 on Bars.

**DEPARTMENT OF COMMERCE**  
**National Bureau of Standards**  
**VOLUNTARY PRODUCT STANDARDS**  
**Notice of Action on Proposed**  
**Withdrawal**

In accordance with the provisions of § 10.12 of the Department's published "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as amended; 35 F.R. 8349 dated May 28, 1970), notice is hereby given of the withdrawal of 66 standards identified below. Each of these standards, Commercial Standard (CS) and Simplified Practice Recommendation (SPR), has been found to be obsolete, no longer technically adequate, no longer acceptable to and used by the industry, or otherwise not in the public interest.

- CS 16-29 Wallpaper.
- CS 26-30 Aromatic Red Cedar Closet Lining.
- CS 27-36 Mirrors.
- CS 28-46 Cotton Fabric Tents, Tarpaulins, and Covers.
- CS 43-32 Grading of Sulphonated (Sulphated) Oils Saponifiable Types.
- CS 61-51 Venetian Blinds (Grade A Custom-Made).
- CS 73-61 Old Growth Douglas Fir, Sitka Spruce, and Western Hemlock Doors.
- CS 76-39 Hardwood Interior Trim and Molding.
- CS 78-40 Ground-and-Polished Lenses for Sun Glasses.
- CS 79-40 Blown, Drawn, and Dropped Lenses for Sun Glasses.
- CS 89-40 Hardwood Stair Treads and Risers.
- CS 92-41 Cedar, Cypress and Redwood Tank Stock Lumber.
- CS 119-45 Dial Indicators (For Linear Measurements).
- CS 133-46 Woven Wire Netting.
- CS 140-47 Testing and Rating Conveyors.
- CS 141-47 Sine Bars, Blocks, Plates and Fixtures.
- CS 159-49 Sun Glass Lenses Made of Ground and Polished Plate Glass Thereafter Thermally Curved.
- CS 160-49 Wood Fiber Blanket Insulation (For Building Construction.)
- CS 161-59 "Standard Grade" Hot Dipped Galvanized Ware (Coated After Fabrication).
- CS 162-49 Tufted Bedspreads.
- CS 167-50 Automotive and General Service Copper Tube.
- CS 168-50 Polystyrene Plastic Wall Tiles, and Adhesives for Their Application.
- CS 169-59 Galvanized Ware Fabricated from Pregalvanized Steel Sheets (For Standard Grade Items Only).
- CS 206-57 Solvent Welded (SWP Size) Cellulose-Acetate Butyrate Pipe.
- CS 225-59 Method of Rating Commercial and Industrial Type Vacuum Cleaners, Portable and Mobile Types.
- CS 232-60 Industrial Wire Cloth.
- CS 244-62 Roof Drainage Products.
- CS 252-63 TFE-Fluorocarbon (Polytetrafluoroethylene) Resin Electrical Insulating Tubing.

- CS 263-64 Aluminum Nails.
- CS 267-65 Steel Medicine Cabinets.
- SPR 11-36 Bed Blanket Sizes.
- SPR 22-40 Paper (Basic Sheet Sizes).
- SPR 31-63 Loaded Shot Shell.
- SPR 37-38 Commercial Forms (Invoice, Purchase Order and Inquiry).
- SPR 42-61 Grocers' Paper Bags.
- SPR 47-54 Cut Tacks and Small Cut Nails.
- SPR 51-29 Chasers for Self-Opening and Adjustable Die Heads.
- SPR 53-63 Steel Spirals for Reinforced Concrete Columns.
- SPR 62-63 Metallic Cartridges.
- SPR 76-40 Ash Handles.
- SPR 81-28 Binders' Board.
- SPR 90-62 Hack-Saw Blades.
- SPR 91-32 Glass Containers for Preserves, Jellies and Apple Butter.
- SPR 129-59 Merchandise Paper Bags.
- SPR 146-52 Corrugated and Solid-Fiber Boxes for Canned Fruits and Vegetables.
- SPR 150-34 Copper Wire Nails.
- SPR 155-49 Cans for Fruits and Vegetables (Names, Dimensions, Capacities and Designated Use).
- SPR 162-35 Packaging of Air Brake (Electric Railway) Parts.
- SPR 173-54 Stock Folding Boxes for Millinery.
- SPR 197-51 Glass Containers for Maraschino Cherries.
- SPR 208-55 Fluid-Milk Cans.
- SPR 213-45 Asphalt Roll Roofing and Asphalt and Tar-Saturated Felt Products.
- SPR 217-49 Copper Water Tube, and Copper and Brass Pipe.
- SPR 218-46 Paper Tubes for Packaging Milk Bottle Caps.
- SPR 223-47 Wire Nails and Staples.
- SPR 228-47 Pallets for Handling Groceries and Packaged Merchandise.
- SPR 235-48 Copper and Copper-Alloy Round Seamless Tube.
- SPR 241-50 Copper and Copper-Alloy Rod.
- SPR 246-51 Wooden Kegs for Nails.
- SPR 248-52 Packaging of Standard Malleable Iron Screwed Pipe Fittings, Black or Galvanized.
- SPR 250-53 Standard Drug Catalogs.
- SPR 251-54 Packaging of Gas Stop Cocks.
- SPR 254-54 Packaging of Steel Pipe Couplings.
- SPR 256-55 Steel Outlet Boxes, Zinc or Cadmium Coated.
- SPR 262-60 Acoustical Materials.
- SPR 263-60 Standard Shapes, Sizes, Grades and Designations of Cemented Carbide Products.

Public notice of the Department's intention to withdraw these standards was published in the FEDERAL REGISTER on March 3, 1972 (37 F.R. 4459), and a 45-day period was provided for the submission of comments or objections concerning the proposed withdrawal of any of these standards. No objections to the Department's intention of withdrawing any of these standards have been received by the National Bureau of Standards.

→ The effective date for the withdrawal of these standards will be 60 days after the publication of this notice. This withdrawal action terminates the authority to refer to these standards as Voluntary Product Standards developed under the Department of Commerce Procedures.

Dated: April 27, 1972.

PROMULGATION

of

COMMERCIAL STANDARD CS133—46

for

WOVEN-WIRE NETTING

---

On June 27, 1945, at the instance of the Hardware Cloth and Poultry Netting Institute, a meeting of producers of woven-wire netting adopted the proposed commercial standard for this commodity. This was submitted on July 30, to leading manufacturers, interested Government agencies, and distributor and user organizations, for constructive comment. Following adjustment in the light of the comment received, the recommended commercial standard was circulated for written acceptance on February 26, 1946.

Those concerned have since accepted and approved the standard as shown herein for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

The standard is effective for new production from June 1, 1946.

Promulgation recommended.

F. W. Reynolds,  
*Acting Chief, Division of Trade Standards.*

Promulgated.

E. U. Condon,  
*Director, National Bureau of Standards.*

Promulgation approved.

Henry A. Wallace,  
*Secretary of Commerce.*

# WOVEN-WIRE NETTING

## COMMERCIAL STANDARD CS133-46

### PURPOSE

1. The purpose of this commercial standard is to provide a nationally recognized minimum standard of quality of woven-wire netting. It will enable consumers and other interested parties to know what sizes and types of woven-wire netting are standard and are regularly produced in sufficient volume to reasonably assure their being readily obtainable through normal channels of trade.

### SCOPE

2. This standard covers materials, workmanship, and dimensional requirements for various types and kinds of galvanized carbon-steel woven-wire netting ordinarily employed for poultry runs and pens, domestic animal pens, fur-bearing animal pens, crab traps, and stucco (exterior plaster) reinforcement. These commodities are sometimes colloquially known as chicken wire, fox pen netting, tennis court netting, stucco mesh, etc. This standard does not include welded mesh or fabric of any description, nor does it cover farm or field fencing. A recommended form for guaranteeing compliance with this standard is included.

### DEFINITIONS

3. *Poultry netting*.—A carbon-steel woven-wire netting made in either hexagonal or straight line types of mesh, and in both galvanized-before-woven and galvanized-after-woven finishes.

4. *Fur farm netting*.—Hexagonal mesh only; identically the same in type as galvanized-after-woven, hexagonal-mesh poultry netting, the only difference being that the wire sizes employed are heavier than No. 20. (See par. 10.) Under normal conditions, the heavier the wire size, the longer will be the life of the netting. Wire diameters increase in inverse ratio to the gage numbers, i. e., No. 14 wire is heavier than No. 16. (See par. 13.)

5. *Heavy netting*.—Same as fur farm netting. (See par. 4.)

6. *Stucco netting*.—Identical in mesh with galvanized-after-woven, hexagonal-mesh fur farm netting, but specially rolled and otherwise manipulated to insure perfectly straight selvages and with a minimum of "curl" to promote ease and efficiency in its application. (See par. 10.)

7. *Animal pen netting*.—Same as fur farm netting. (See par. 4.)

8. *Crab trap netting*.—Three-fourths inch and 1 inch of No. 20, and 1½ inch of No. 18 hexagonal mesh, are usually considered as being crab trap netting, although other sizes of hexagonal netting may also be used for this purpose.

## MATERIALS AND WORKMANSHIP

9. All standard woven-wire netting shall be made of high-grade materials and with good workmanship. It shall be free from any defects that might detract from its serviceability, or its appearance.

9a. All galvanized-after-woven poultry, crab trap, fur farm, and stucco netting shall be coated with zinc by the hot-dip process. The metal used for the coating shall be zinc of at least 98 percent purity.

## GENERAL SPECIFICATIONS

10. Sizes and types of mesh, and wire sizes and finishes for standard poultry netting, fur farm, animal pen, crab trap netting and stucco reinforcement netting shall be as follows:

TABLE 1.—*Poultry netting*

[Hexagonal mesh. Galvanized-after-woven]

| Hexagonal mesh | Wire size (after galvanizing) |         | Widths and approximate weights per 150-foot roll |     |     |     |     |     |     |         |

| 2"-----        | #16 .0625"                    | {36" wide.<br>81 pounds.                         |

ROLL LENGTH

11. All standard rolls of poultry, fur farm, crab trap, and stucco netting shall be 150 linear feet long, in one continuous length. In trade parlance "rolls" of netting are frequently spoken of as "bales."

MEASUREMENT OF MESH SIZES

12. Absolute uniformity of mesh size in woven-wire netting is commercially impracticable of attainment owing to the extreme flexibility of this type of weave. However, there shall be but slight commercial

variations from true mesh sizes in any standard netting. The measure of the mesh size in hexagonal netting shall be taken between any two parallel twists. The measure of straight-line netting mesh size shall likewise be taken between any two parallel twists.

#### WIRE DIAMETER, OR GAGE

13. All gage numbers used for designating wire sizes for standard woven-wire netting shall be understood to mean the Steel Wire Gage (also known as the Washburn and Moen, "W and M," Gage) after galvanizing, of which the following comprise the decimal equivalents: No. 20, 0.0348 inch; No. 17, 0.0540 inch; No. 14, 0.0800 inch; No. 18, 0.0475 inch; No. 16, 0.0625 inch.

The designated gage (number) of wire for standard woven-wire netting shall mean the size after galvanizing; namely, the bare wire plus the zinc coating.

#### TOLERANCES

14. Permissible variations shall be:

(a) for wire diameters: 0.0015 inch minus for Nos. 16 to 20; 0.002 inch minus for all wire diameters coarser than No. 16.<sup>1</sup>

(b) for mesh size (measurement): Hexagonal mesh,  $\frac{1}{8}$ -inch plus or minus; Straight Line mesh,  $\frac{1}{8}$ -inch plus or minus.

(c) for width: 5 percent plus or minus

(d) for roll (bale) weight: minus 10 percent.<sup>1</sup>

(e) for roll (bale) length: minus 1 percent.<sup>1</sup>

#### LABELING

15. The mesh type and size, finish and size of wire, and the length and the width of netting, in each roll of standard woven-wire netting, shall be shown in a conspicuous place, preferably by means of a printed tag securely attached to the roll.

#### GUARANTEE

16. In order to assure the purchaser that he is receiving woven-wire netting that complies with the requirements of this standard, it is recommended that the label or tag on each roll carry the following guarantee:

We hereby guarantee that this woven-wire netting complies with all requirements of Commercial Standard CS133-46, as issued by the National Bureau of Standards of the United States Department of Commerce.

-----  
(Signed)

<sup>1</sup> No limitation specified for oversize wire diameter, overweight, or overlength.

### EFFECTIVE DATE

17. The standard is effective for new production from June 1, 1946.

### STANDING COMMITTEE

18. The following individuals comprise the membership of the standing committee, as appointed by the National Bureau of Standards. This committee is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

GEORGE F. WRIGHT (chairman), G. F. Wright Steel & Wire Co., 243 Stafford St., Worcester 3, Mass.

RALPH W. BACON, Hardware Cloth & Poultry Netting Institute, 74 Trinity Pl., New York 6, N. Y.

L. B. JACKSON, Wickwire Brothers, Inc., Cortland, N. Y.

A. L. HAGLUND, Northwestern Steel & Wire Co., Sterling, Ill.

THOMAS A. FERNLEY, Jr., National Wholesale Hardware Association, 505 Arch St., Philadelphia 6, Pa.

RIVERS PETERSON, National Retail Hardware Association, 333 North Pennsylvania St., Indianapolis 4, Ind.

G. IRVING BAILY, American Retail Federation, 1627 K St. NW., Washington 6, D. C.

Northeastern Poultry Producers' Council (invited to name a representative).

National Board of Fur Farmers' Organizations (invited to name a representative).

T. W. McALLISTER, Southern Hardware Jobbers Association, Orlando, Fla.

L. V. JUDSON, National Bureau of Standards, Washington 25, D. C.

### HISTORY OF PROJECT

19. On September 26, 1944, the Hardware Cloth & Poultry Netting Institute requested the cooperation of the National Bureau of Standards in the establishment of a commercial standard for woven-wire netting. A preliminary draft of the proposed commercial standard was submitted to manufacturers for their review and comment. All comment was carefully considered at a meeting held in New York City on June 27, 1945. An adjusted draft was then prepared and submitted on July 30, 1945, to technical organizations, Government agencies, testing laboratories, and manufacturers, and wholesale, retail, and user organizations for further review and comment. The standard was then modified in accordance with composite recommendations of those concerned and circulated on February 26, 1946, to the trade for written acceptance.

20. Upon receipt of official acceptances estimated to represent a satisfactory majority of the production by volume and in the absence of active valid opposition, the standard was promulgated on May 1, 1946 as Commercial Standard CS133-46.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date.....

Division of Trade Standards,  
National Bureau of Standards,  
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS133-46 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

production <sup>1</sup>            distribution <sup>1</sup>            purchase <sup>1</sup>            testing <sup>1</sup>

of woven-wire netting.

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer.....

(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer.....

Organization.....

(Fill in exactly as it should be listed)

Street address.....

City, Zone, and State.....

<sup>1</sup> Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General Support" should be added after the signature.

(Cut on this line)

## TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

## ACCEPTORS

21. The organizations listed below have individually accepted these grading rules for use as far as practicable in the production, distribution, testing, or purchase of woven-wire netting. In accepting the standard, they reserve the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.

| CS No.     | Item                                                                                               | CS No. | Item                                                                                                                                                |
|------------|----------------------------------------------------------------------------------------------------|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| 0-40.      | Commercial standards and their value to business (third edition.)                                  | 51-35. | Marking articles made of silver in combination with gold.                                                                                           |
| 1-42.      | Clinical thermometers (third edition).                                                             | 52-35. | Mohair pile fabrics (100-percent mohair plain velvet, 100-percent mohair plain frieze, and 50-percent mohair plain frieze).                         |
| 2-30.      | Mopsticks.                                                                                         | 53-35. | Colors and finishes for cast stone.                                                                                                                 |
| 3-40.      | Stoddard solvent (third edition).                                                                  | 54-35. | Mattresses for hospitals.                                                                                                                           |
| 4-29.      | Staple porcelain (all-clay) plumbing fixtures.                                                     | 55-35. | Mattresses for institutions.                                                                                                                        |
| 5-46.      | Pipe nipples, brass, copper, steel, and wrought-iron (second edition).                             | 56-41. | Oak flooring (second edition).                                                                                                                      |
| 6-31.      | Wrought-iron pipe nipples (second edition). Superseded by CS5-46.                                  | 57-40. | Book cloths, buckrams, and impregnated fabrics for bookbinding purposes except library bindings (second edition).                                   |
| 7-29.      | Standard weight malleable iron or steel screwed unions.                                            | 58-36. | Woven elastic fabrics for use in overalls (overall elastic webbing).                                                                                |
| 8-41.      | Gage blanks (third edition).                                                                       | 59-44. | Textiles—testing and reporting (fourth edition).                                                                                                    |
| 9-33.      | Builders' template hardware (second edition).                                                      | 60-36. | Hardwood dimension lumber.                                                                                                                          |
| 10-29.     | Brass pipe nipples. Superseded by CS5-46.                                                          | 61-37. | Wood-slat venetian blinds.                                                                                                                          |
| 11-41.     | Moisture regains of cotton yarns (second edition).                                                 | 62-38. | Colors for kitchen accessories.                                                                                                                     |
| 12-40.     | Fuel oils (fifth edition).                                                                         | 63-38. | Colors for bathroom accessories.                                                                                                                    |
| 13-44.     | Dress patterns (fourth edition).                                                                   | 64-37. | Walnut veneers.                                                                                                                                     |
| 14-43.     | Boys' button-on waists, shirts, junior and sport shirts (made from woven fabrics) (third edition). | 65-43. | Methods of analysis and of reporting fiber composition of textile products (second edition).                                                        |
| (E) 15-43. | Men's pajamas (made from woven fabrics) (second edition).                                          | 66-38. | Marking of articles made wholly or in part of platinum.                                                                                             |
| 16-29.     | Wall paper.                                                                                        | 67-38. | Marking articles made of karat gold.                                                                                                                |
| 17-42.     | Diamond core drill fittings (third edition).                                                       | 68-38. | Liquid hypochlorite disinfectant, deodorant, and germicide.                                                                                         |
| 18-29.     | Hickory golf shafts.                                                                               | 69-38. | Pine oil disinfectant.                                                                                                                              |
| 19-32.     | Foundry patterns of wood (second edition).                                                         | 70-41. | Phenolic disinfectant (emulsifying type) (second edition) (published with CS71-41).                                                                 |
| 20-42.     | Staple vitreous china plumbing fixtures (third edition).                                           | 71-41. | Phenolic disinfectant (soluble type) (second edition) (published with CS70-41).                                                                     |
| 21-39.     | Interchangeable ground-glass joints, stopcocks, and stoppers (fourth edition).                     | 72-38. | Household insecticide (liquid spray type).                                                                                                          |
| 22-40.     | Builders' hardware (nontemplate) (second edition).                                                 | 73-45. | Old growth Douglas fir standard stock doors (third edition).                                                                                        |
| 23-30.     | Feldspar.                                                                                          | 74-39. | Solid hardwood wall paneling.                                                                                                                       |
| 24-43.     | Screw threads and tap-drill sizes.                                                                 | 75-42. | Automatic mechanical draft oil burners designed for domestic installations (second edition).                                                        |
| 25-30.     | Special screw threads. Superseded by CS24-43.                                                      | 76-39. | Hardwood interior trim and molding.                                                                                                                 |
| 26-30.     | Aromatic red cedar closet lining.                                                                  | 77-40. | Sanitary cast-iron enameled ware.                                                                                                                   |
| 27-36.     | Mirrors (second edition).                                                                          | 78-40. | Ground-and-polished lenses for sun glasses (second edition) (published with CS79-40).                                                               |
| 28-46.     | Cotton fabric tents, tarpaulins and covers (second edition).                                       | 79-40. | Blown, drawn, and dropped lenses for sun glasses (second edition) (published with CS78-40).                                                         |
| 29-31.     | Staple seats for water-closet bowls.                                                               | 80-41. | Electric direction signal systems other than semaphore type for commercial and other vehicles subject to special motor vehicle laws (after market). |
| 30-31.     | Colors for sanitary ware.                                                                          | 81-41. | Adverse-weather lamps for vehicles (after market).                                                                                                  |
| 31-38.     | Wood shingles (fourth edition).                                                                    | 82-41. | Inner-controlled spotlamps for vehicles (after market).                                                                                             |
| 32-31.     | Cotton cloth for rubber and pyroxylin coating.                                                     | 83-41. | Clearance, marker, and identification lamps for vehicles (after market).                                                                            |
| 33-43.     | Knit underwear (exclusive of rayon) (second edition).                                              | 84-41. | Electric tail lamps for vehicles (after market).                                                                                                    |
| 34-31.     | Bag, case, and strap leather.                                                                      | 85-41. | Electric license-plate lamps for vehicles (after market).                                                                                           |
| 35-42.     | Plywood (hardwood and eastern red cedar) (second edition).                                         | 86-41. | Electric stop lamps for vehicles (after market).                                                                                                    |
| 36-33.     | Fourdrinier wire cloth (second edition).                                                           | 87-41. | Red electric warning lanterns.                                                                                                                      |
| 37-31.     | Steel bone plates and screws.                                                                      | 88-41. | Liquid-burning flares.                                                                                                                              |
| 38-32.     | Hospital rubber sheeting.                                                                          | 89-40. | Hardwood stair treads and risers.                                                                                                                   |
| 39-37.     | Wool and part wool blankets (second edition). (Withdrawn as commercial standard, July 14, 1941).   | 90-    | (Reserved for power shovels and cranes).                                                                                                            |
| 40-32.     | Surgeons' rubber gloves.                                                                           | 91-41. | Factory-fitted Douglas fir entrance doors.                                                                                                          |
| 41-32.     | Surgeons' latex gloves.                                                                            | 92-41. | Cedar, cypress and redwood tank stock lumber.                                                                                                       |
| 42-43.     | Structural fiber insulating board (third edition).                                                 | 93-41. | Portable electric drills (exclusive of high frequency).                                                                                             |
| 43-32.     | Grading of sulphonated oils.                                                                       | 94-41. | Calking lead.                                                                                                                                       |
| 44-32.     | Apple wraps.                                                                                       | 95-41. | Lead pipe.                                                                                                                                          |
| 45-45.     | Douglas fir plywood (sixth edition).                                                               |        |                                                                                                                                                     |
| 46-40.     | Hosiery lengths and sizes (third edition).                                                         |        |                                                                                                                                                     |
| 47-45.     | Marking of gold-filled and rolled-gold-plate articles other than watchcases.                       |        |                                                                                                                                                     |
| 48-40.     | Domestic burners for Pennsylvania anthracite (underfeed type) (second edition).                    |        |                                                                                                                                                     |
| 49-34.     | Chip board, laminated chip board, and miscellaneous boards for bookbinding purposes.               |        |                                                                                                                                                     |
| 50-34.     | Binders board for bookbinding and other purposes.                                                  |        |                                                                                                                                                     |
