COMMODITY STANDARDS

Simplified Practice Recommendations and Commercial Standards are developed by manufacturers, distributors, and users in cooperation with the Commodity Standards Division of the National Bureau of Standards. The purpose of Simplified Practice Recommendations is to eliminate avoidable waste through the establishment of standards of practice for stock sizes and varieties of specific commodities that currently are in general production and demand. The purpose of Commercial Standards is to establish standard methods of test, rating, certification, and labeling of commodities, and to provide uniform bases for fair competition.

The adoption and use of a Simplified Practice Recommendation or Commercial Standard is voluntary. However, when reference to a Commercial Standard is made in contracts, labels, invoices, or advertising literature, the provisions of the standard are enforceable through usual legal channels as a part of the sales contract.

A Simplified Practice Recommendation or Commercial Standard originates with the proponent industry. The sponsors may be manufacturers, distributors, or users of the specific product. One of these three elements of industry submits to the Commodity Standards Division the necessary data to be used as the basis for developing a standard of practice. The Division, by means of assembled conferences or letter referenda, or both, assists the sponsor group in arriving at a tentative standard of practice and thereafter refers it to the other elements of the same industry for approval or for constructive criticism that will be helpful in making any necessary adjustments. The regular procedure of the Division assures continuous servicing of each effective Simplified Practice Recommendation and Commercial Standard, through review and revision, whenever, in the opinion of the industry, changing conditions warrant such action. Simplified Practice Recommendations and Commercial Standards are printed and made available by the Department of Commerce through the Government Printing Office.

COMMERCIAL STANDARD FOR HOSIERY LENGTHS AND SIZES

On October 29, 1931, a general conference of representative manufacturers, distributors, and buyers of hosiery adopted a recommended commercial standard for this commodity, which was subsequently accepted by the industry and promulgated as Commercial Standard CS46-33, Hosiery lengths. In 1936 the standard was revised to include a method of measuring size of foot, and it was reissued as CS46-36, Hosiery lengths and sizes. Another revision, approved for promulgation in 1940, added standard lengths of anklets.

On January 31, 1949, the standing committee recommended that the standard again be revised to include men's athletic and crew socks, and men's and boys' slack socks. Those concerned have since accepted and approved the revised standard as shown herein.

Project Manager: L. R. GILBERT, Commodity Standards Division, National Bureau of Standards.

Technical Adviser: W. D. APPEL, Organic and Fibrous Materials Division, National Bureau of Standards.

COMMERCIAL STANDARD CS46-49

for

HOSIERY LENGTHS AND SIZES

(FOURTH EDITION)

GENERAL

1. *Purpose.*—The purpose of this standard is to provide standard methods of measuring and standard measurements of hosiery for the guidance of producers, distributors, and users, in order to eliminate confusion resulting from a diversity of measurements and methods, and to provide a uniform basis for guaranteeing full-length and full-size hosiery.

2. *Application.*—The methods and measurements given herein are applicable to finished hosiery as delivered by the manufacturer.

3. *Method of measuring.*—The hosiery to be measured is laid out without tension on a smooth flat surface so that creases and wrinkles will not affect the measurements.

4. *Accuracy.*—Measurements are taken to the nearest one-eighth inch, unless otherwise specified.

METHOD OF MEASURING AND STANDARD LENGTHS

LADIES' HOSIERY

5. *Method of measuring length.*—The selected method for measuring the length of ladies' hosiery is shown diagrammatically in figure 1. It is as follows: Lay the stocking on a flat surface without tension. For circular-knit hosiery, place a ruler so that it touches the lower end of the heel gore and the curve formed at the ankle. The length is the distance from the bottom of the heel *A* to the top of the stocking *B* as located by this line. For full-fashioned hosiery this line of length shall be determined by laying the ruler so that it touches the curve at the ankle and is parallel to the front line of the stocking.

6. *Lengths of full-fashioned and circular-knit (seamless) hosiery.*—The standard length of ladies' full-fashioned and circular-knit (seamless) hosiery is 30 inches in all sizes, and this length will be furnished when not otherwise specified. Other lengths are available as required. Tolerance for all lengths, plus or minus 1 inch.

7. *Lengths of ribbed cotton hosiery.*—The standard length of ladies' ribbed cotton hosiery is 28 inches in all sizes, and this length will be furnished when not otherwise specified. Other lengths are available as required. Tolerance for all lengths, plus or minus 1 inch.

8. *Nonstandard lengths.*—Ladies' hosiery in lengths other than standard carry a significant mark, generally on the container, to indicate the fact that they are either longer or shorter than standard.

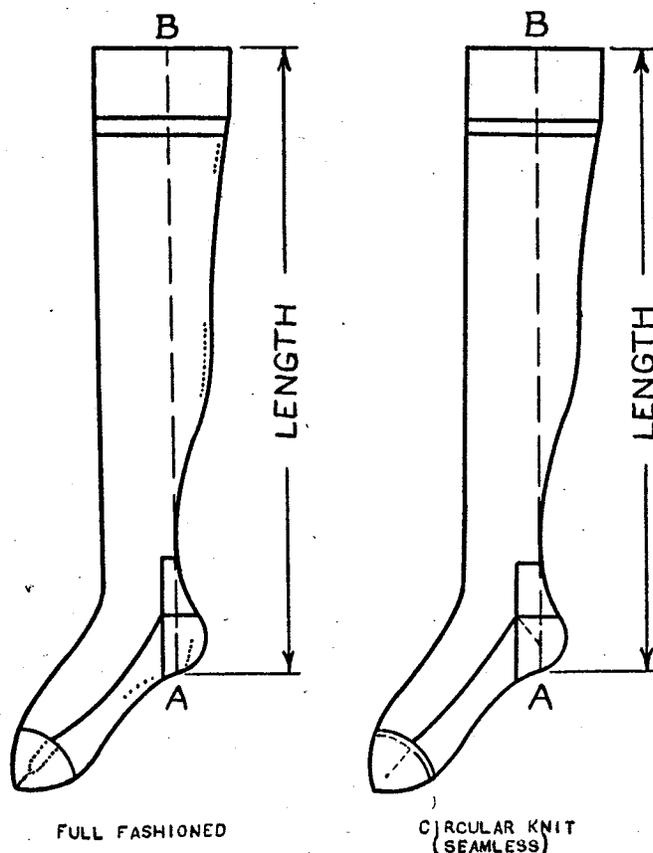

FIGURE 1. Ladies' hosiery.

MEN'S, CHILDREN'S, AND INFANTS' HOSIERY

9. Method of measuring length of—

- (1) Men's hosiery.
- (2) Boys' hosiery.
- (3) Children's and misses' ribbed hosiery.
- (4) Children's $\frac{5}{8}$ flat-knit hosiery.
- (5) Children's $\frac{7}{8}$ hosiery.
- (6) Infants' ribbed hosiery.
- (7) Infants' and children's socks.

9a. Lay the stocking (or sock) on a flat surface without tension. For circular-knit hosiery, place a ruler so that it touches the lower end of the heel gore and is parallel to the ribs on the ribbed portion. If the stocking has been boarded properly, the ruler will be parallel to its front line. If this is not so, adjust the ruler so that it is parallel to the front line of the stocking. The length is the distance from the bottom of the heel *A* to the top of the stocking *B* as located by this line (fig. 2). The lengths of men's full-fashioned hosiery may be measured according to the method given in paragraph 5 for women's full-fashioned hosiery.

9b. The length of the cuff on the stocking, folded as for distribution, is determined by measuring the distance from the top to the bottom at the center in a line parallel with the front of the stocking.

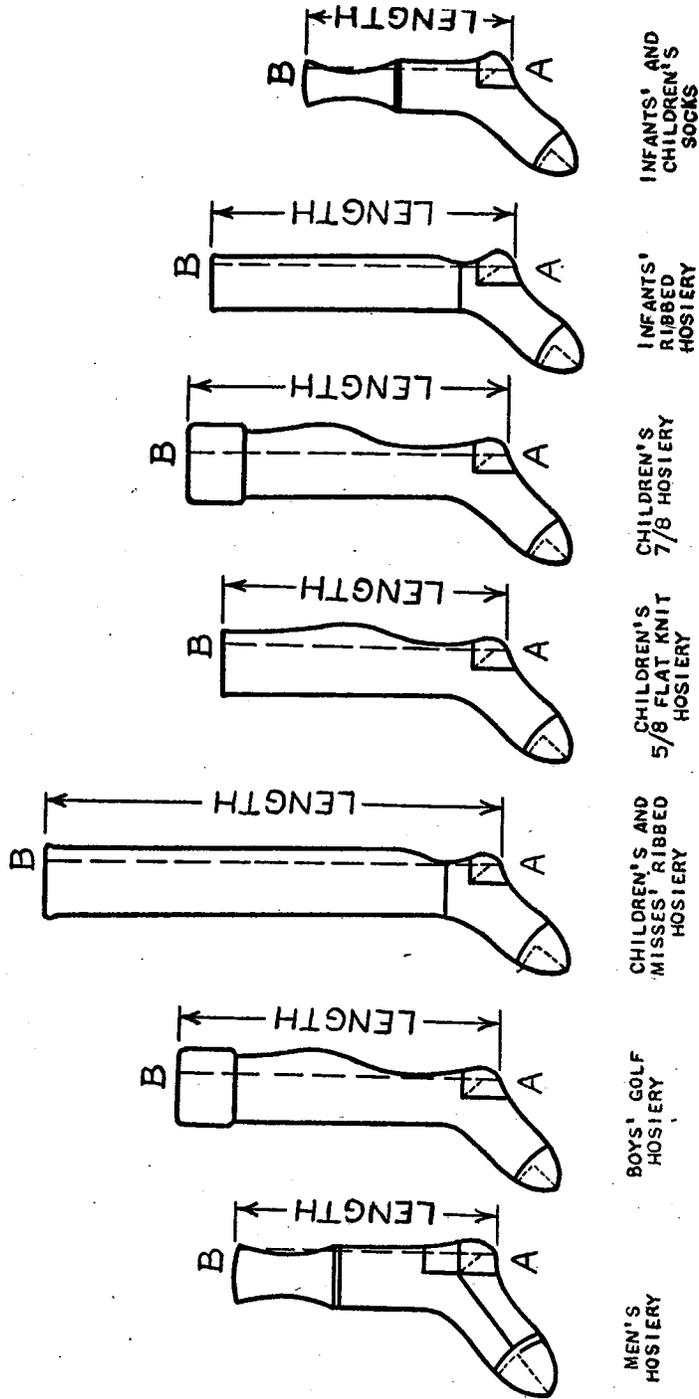

FIGURE 2. Men's and children's hosiery.

10. *Men's hosiery.*—Standard lengths of men's hosiery are shown in tables 1 to 4.

ANKLETS

18. Method of measuring length of—

- (1) Anklets.
- (2) Folded cuffs.

18a. *Anklets.*—Lay the anklet, with cuff folded, on a flat surface without tension. For *full-fashioned anklets*, place a ruler so that it touches the curve at the ankle and is parallel to the front line of the anklet. For *circular-knit anklets*, place a ruler so that it passes through the lower end of the heel gore and is parallel to the ribs of the ribbed portion of the cuff. The length is the distance from the bottom of the heel to the top of the folded cuff (A to B, fig. 3). These methods of measuring also apply to anklets finished in single-cuff style.

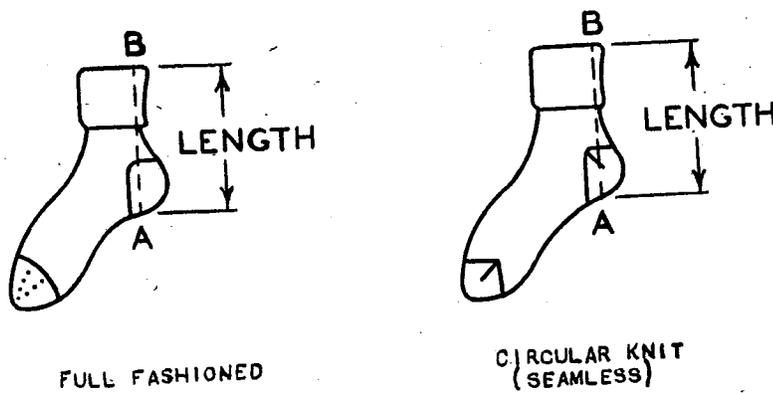

FIGURE 3. Anklets.

18b. *Folded cuffs.*—The length of the cuff on the anklet, folded as for distribution, is determined by measuring the distance from the top to the bottom of the cuff in a line parallel with the front of the anklet.

19. *Anklet lengths.*—Lengths of anklets (table 14) relate to anklets made of cotton, mercerized cotton, rayon, rayon plated, rayon and silk, and all mixtures of the foregoing with wool in which the wool content does not exceed 25 percent by weight. The number of machine needles and the cylinder size specified in table 14 shall be used for the sizes and lengths of anklets indicated.

TABLE 14. Anklets (folded and single cuffs)—lengths, needles, and cylinder size

Size	Number of needles	Size of cylinder (diameter)	Standard length	Tolerance
		<i>Inches</i>	<i>Inches</i>	<i>Inch</i>
5-5½	120-160	2¼-2½	4	±¼
6-6½	120-180	2¼-3	4½	±¼
7-7½	130-200	2½-3¼	5	±¼

8-8½	2¼	±¼
9-9½	2¼	±¼
10-10½	2½	±¼
11-11½	2½	±¼

METHOD OF MEASURING SIZE OF FOOT

21. *Size of full-fashioned hosiery.*—The size of foot of full-fashioned hosiery is determined by laying the stocking out flat and measuring the distance from the tip of the toe to the back of the heel along a straight line from the tip of the toe through the uppermost fashion mark in heel, which is approximately 1 inch above the bottom of the heel. Measurements are made to the nearest one-half inch. (See fig. 4.)

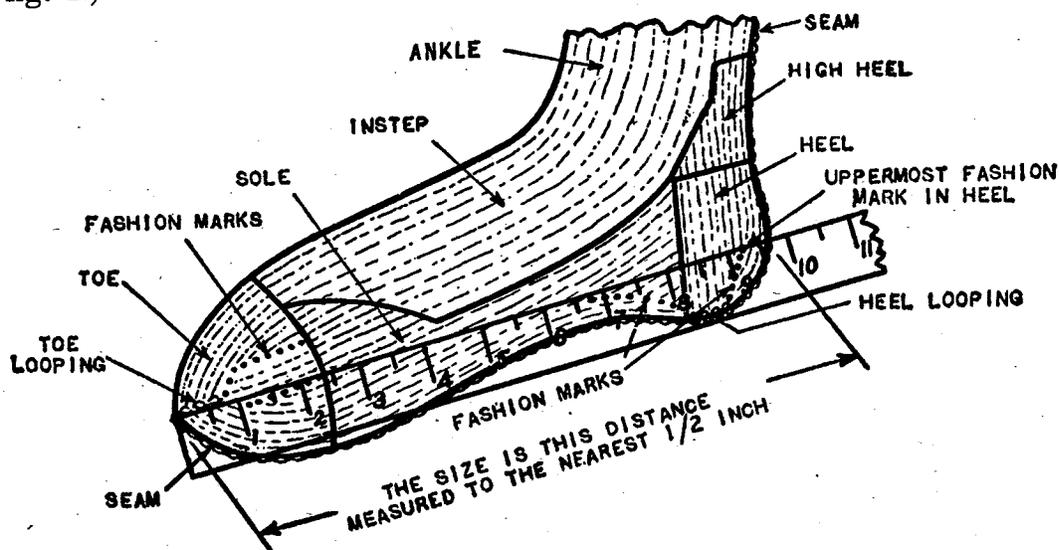

FIGURE 4. *Full-fashioned hosiery.*

22. *Size of circular-knit (seamless) hosiery.*—The size of foot of circular-knit (seamless) hosiery is determined by laying the stocking out flat and measuring the distance from the tip of the toe to the back of the heel along a straight line through the tip of the toe and the bottom of the heel gore. Measurements are made to the nearest one-half inch. (See fig. 5.)

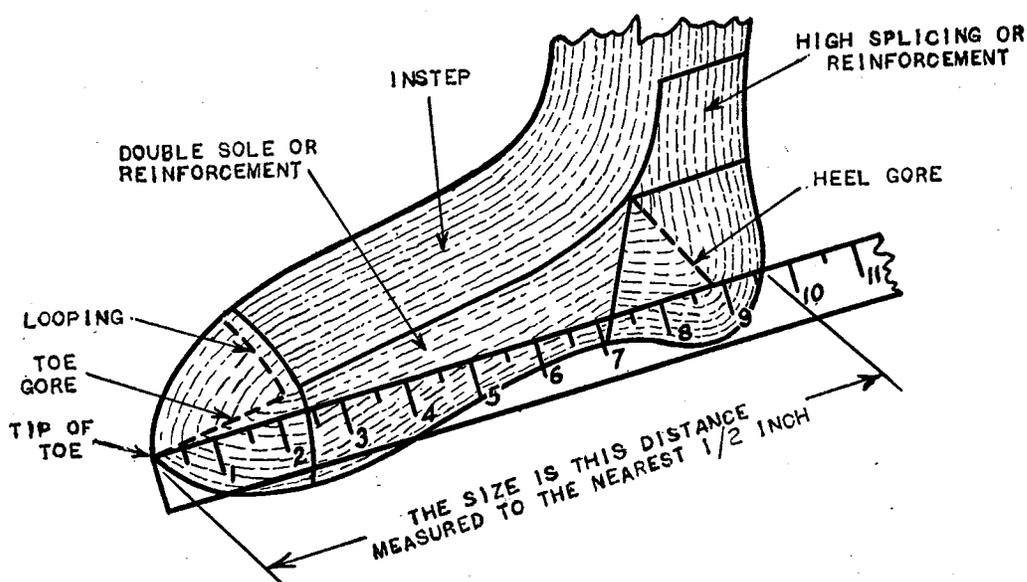

FIGURE 5. Circular-knit (seamless) hosiery.

EFFECTIVE DATE

23. Having been passed through the regular procedure of the Commodity Standards Division, and approved by the acceptors herein-after listed, this commercial standard was issued by the United States Department of Commerce, effective from June 22, 1949.

Edwin W. Ely,

Chief, Commodity Standards Division.

HISTORY OF PROJECT

On September 9, 1931, the National Association of Hosiery and Underwear Manufacturers (now the National Association of Hosiery Manufacturers) presented a specification for men's, women's, and children's hosiery lengths, and requested that it be considered by a general conference of manufacturers, distributors, and users of hosiery for adoption as a commercial standard. This specification was developed with the cooperation of the industry by E. M. Schenke, Director of Research, the National Association of Hosiery and Underwear Manufacturers.

A general conference was held in Philadelphia on October 29, 1931, at which time the tentative draft of the proposed commercial standard was revised, and adopted with the recommendation that it be circulated to manufacturers, distributors, and users for written acceptance. This conference appointed a standing committee to review periodically all comments and suggestions leading to revisions of the standard.

The recommended commercial standard was circulated for acceptance on December 5, 1931, and was endorsed by a large majority of those concerned. However, there later developed a need for standard measurements of children's hosiery, in consequence of which the standard was amended to include measurements for the different types and sizes.

With the approval of the standing committee, the amended standard was circulated on January 12, 1933, to all elements of the industry for

written acceptance, with the result that it was accepted and approved for promulgation as Commercial Standard CS46-33, Hosiery lengths. It became effective July 1, 1933.

FIRST REVISION

On February 21, 1936, the National Association of Hosiery Manufacturers requested the reaction of the standing committee to a recommendation that "Method of measuring size of foot" of full-fashioned and circular-knit (seamless) hosiery be added to the standard. The standing committee endorsed the proposal, recommending that the commercial standard be revised accordingly and that its title be changed to "Hosiery lengths and sizes."

A satisfactory majority of those directly concerned approved this recommendation as circulated for acceptance on May 1, 1936. The success of the revision was announced July 20, 1936, and Commercial Standard CS46-36 became effective on that date.

SECOND REVISION

On September 25, 1939, the National Association of Hosiery Manufacturers proposed that Commercial Standard CS46-36 be revised to include methods of measuring and standard lengths for anklets, and additional sizes and lengths of folded ribbed cuffs.

With the approval of the standing committee, the recommended revision was circulated for written acceptance on November 20, 1939, and was approved by a satisfactory majority of the trade. The success of the project was announced on July 17, 1940, and the revised standard, designated CS46-40, became effective from August 15, 1940.

THIRD REVISION

On October 18, 1948, the National Association of Hosiery Manufacturers requested that Commercial Standard CS46-40 be revised to include standard lengths of men's athletic socks, men's crew socks, and men's and boys' slack socks.

Upon approval by the standing committee, the recommended revision was circulated on February 17, 1949, to interested producers, distributors, testing laboratories, and users for written acceptance.

Having received acceptances in writing estimated to represent a satisfactory majority, an announcement was issued on April 22 that the fourth edition of the standard would become effective for new production from June 22, 1949.

STANDING COMMITTEE

The following individuals comprise the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Commodity Standards Division, National Bureau of Standards, which acts as secretary for the committee.

MANUFACTURERS

Men's hosiery:

J. W. METTLER (chairman), Interwoven Stocking Co., New Brunswick, N. J.
 P. W. ESHELMAN, Wilkes Hosiery Mills Co., North Wilkesboro, N. C.
 FRAZIER D. MACIVER, Phoenix Hosiery Co., 320 East Buffalo Street, Milwaukee, Wis.
 R. MAYNE BUNDY, Adams-Millis Corp., High Point, N. C.

Women's hosiery:

R. E. TILLIS (chairman), Gotham Hosiery Co., Inc., 200 Madison Avenue, New York, N. Y.
 HUGO HEMMERICH, Berkshire Knitting Mills, Reading, Pa.
 F. ELWOOD STRUVE, Apex Hosiery Co., Fifth and Luzerne Streets, Philadelphia, Pa.
 G. C. ABERLE, H. C. Aberle Co., Lippincott, Clearfield, and A Streets, Philadelphia, Pa.

Children's hosiery:

J. LEE BAUSER (chairman), Infants' Socks, Inc., 210 Maple Street, Reading, Pa.
 FRANKLIN LANDENBERGER, J. W. Landenberger & Co., Castor at Kensington Avenue, Philadelphia, Pa.
 R. P. SHAPARD, JR., Spalding Knitting Mills, Griffin, Ga.
 DAN MAY, May Hosiery Mills, 436 Houston Street, Nashville, Tenn.

DISTRIBUTORS AND USERS

All types of hosiery:

T. L. BLANKE, Greeley Square Building, 100 West Thirty-first Street, New York, N. Y. (representing National Retail Dry Goods Association).
 LOUIS ROTHSCHILD, Washington Loan & Trust Building, Washington, D. C. (representing National Association of Retail Clothiers & Furnishers).
 JOSEPH P. BUBLA, 40 Worth Street, New York 13, N. Y. (representing Wholesale Dry Goods Institute).
 HARRY C. MILLS, J. C. Penney Co., 330 West Thirty-fourth Street, New York, N. Y.
 ARDENIA CHAPMAN, Drexel Institute, Thirty-second and Chestnut Streets, Philadelphia, Pa. (representing American Home Economics Association).
 MRS. ERNEST H. DANIEL, Broad Branch and Grant Roads NW., Washington, D. C. (representing General Federation of Women's Clubs).

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date.....

Commodity Standards Division,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS46-49 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

production¹ distribution¹ purchase¹ testing¹

of hosiery. We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer.....
(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer.....

Organization.....
(Fill in exactly as it should be listed)

Street address.....

City, zone, and State.....

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General Support" should be added after the signature.

(Cut on this line)

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria, and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

The organizations and individuals listed below have individually accepted this standard for use as far as practicable in the production, distribution, purchase, or testing of hosiery. In accepting the standard they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.
